Job description System- and Network Administrator

servus.at is a non-profit net culture initiative based in Linz. The association is internationally recognized for its know-how in the use of open source solutions and the extraordinary realizations of art and cultural projects that deal with the mediation of complex contexts of an increasingly networked information society.

As a non-profit organization, servus.at deals with the demystification of technology and organizes, among other things, the biennial festival "Art Meets Radical Openness" in cooperation with the Art University Linz. https://radical-openness.org/

The association also operates an independent data center with open source basic services for its members, consisting of art and culture creators, alternative educational institutions, free media, university institutions and NGOs. https://core.servus.at/ & https://book.servus.at/

Currently the association servus.at is looking for a **System and Network Administrator**
